Since the dawn of aviation, Idahoans have employed aircraft to carry people, groceries, mail, freight, and livestock over inhospitable terrain. Idaho's airstrips are the stuff of dreams, offering pilots, anglers, hikers, and river-rafters access to deep wilderness less than an hour from the city. Aerial firefighting was born--and is based--in Idaho. Flight instructors in Idaho prepared thousands of pilots to fight in World War II. As the birthplace of United Airlines, with its famed friendly skies, Idaho is one of the country's most aviation-friendly states. Government officials, private landowners, and volunteers have worked together to create and then preserve an infrastructure of big-city, small-town, and backcountry airstrips that are the envy of pilots worldwide.

It delves into everything from the realities of making the go/no-go decision during the takeoff roll, nailing spot landings, which emergencies to practice, and how to take babies and kids flying. It explores how we scare our passengers without realizing it, IFR training in IMC, and takes a hard look at spin training. Rick Durden is one of three 2015 recipients of the Endeavor Award, honoring volunteer pilots who have made significant contributions to flying to serve the public. For 25 years he has made flights in remote areas of the U.S. and Central America in support of conservation. He is an Airline Transport-rated pilot with experience in over 200 types of airplanes, a practicing aviation attorney who has been involved in hundreds of aircraft accident cases, writer, aviation magazine editor, safety counselor, and flight instructor.
