hungarian physical traits: *Freax* Tamás, Polgár, 2016-04-17 FREAX – the biggest book ever written about the history of the computer demoscene. The book tells the complete history of the Commodore 64 and the Amiga, both about the machines and about the underground subcultures around them, from the cracker- and warez-scene to the demoscene, from hacking and phreaking to the ASCII art scene. Interviews with scene celebrities, former key persons of the computer industry, citations from contemporary magazines and fanzines make the narrative history of the big adventure complete. The book contains 350 pages and is illustrated with 480 color photos and screenshots. This is the comprehensive guide to the golden era of home computers.

hungarian physical traits: Hungarians and Europe in the Early Middle Ages András Róna-Tas, 1999-03 Lavishly illustrated, the book contains seventy five historical maps and colour plates which visualize the historical background of Hungary and introduces its early history to a broader readership. The early history of Hungarians is embedded into the history of Eurasia and special attention is given to the relationship of the Hungarians with the Khazars and the Bulghar-Turks. The first part deals with methods and sources which can be used for elucidating the ancient history of the Hungarians, relying on research into linguistics, archaeology, anthropology and natural history. The second part traces how the Hungarians came into the Carpathian Basin and answers such questions as: who are the Magyars, from where did they come and how did they conquer the land? It reconstructs and examines their early political and social structure, the economy, and religion, and compares the Hungarian medieval process with the ethnogenetic processes of the Germanic, Slavic and Turkic people.

hungarian physical traits: A Divided Hungary in Europe Gábor Almási, 2015-01-12 Despite fragmentation, heterogeneity and the continuous pressure of the Ottoman Empire, early modern “divided Hungary” witnessed a surprising cultural flourishing in the sixteenth century, and maintained its common cultural identity in the seventeenth century. This could hardly have been possible without intense exchange with the rest of Europe. This three-volume series about early modern Hungary divided by Ottoman presence approaches themes of exchange of information and knowledge from two perspectives, namely, exchange through traditional channels provided by religious/educational institutions and the system of European study tours (Volume 1 – Study Tours and Intellectual-Religious Relationships), and the less regular channels and improvised networks of political diplomacy (Volume 2 – Diplomacy, Information Flow and Cultural Exchange). A by-product of this exchange of information was the changing image of early modern Hungary and Transylvania, which is presented in the third and in some aspects concluding volume of essays (Volume 3 – The Making and Uses of the Image of Hungary and Transylvania). Unlike earlier approaches to the same questions, these volumes draw an alternative map of early modern Hungary. On this map, the centre-periphery conceptions of European early modern culture are replaced by new narratives written from the perspective of historical actors, and the dominance of Western-Hungarian relationships is kept in balance due to the significance of Hungary’s direct neighbours, most importantly the Ottoman Empire.

hungarian physical traits: *Mathematical Cultures* Brendan Larvor, 2016-05-25 This collection presents significant contributions from an international network project on mathematical cultures, including essays from leading scholars in the history and philosophy of mathematics and

mathematics education. Mathematics has universal standards of validity. Nevertheless, there are local styles in mathematical research and teaching, and great variation in the place of mathematics in the larger cultures that mathematical practitioners belong to. The reflections on mathematical cultures collected in this book are of interest to mathematicians, philosophers, historians, sociologists, cognitive scientists and mathematics educators.

hungarian physical traits: *Women in True Crime Media* Jen Erdman, 2022-10-28 While many people think true crime is a new phenomenon, Americans have been obsessed with the genre for over a century, and popular culture continuously tries to cash in. The names of infamous serial killers are well-known, but the identities of their often-female victims are frequently lost to history. This text flips the script and focuses on the women to keep their identities known and remembered. This is the first book to examine how popular culture has mistreated women as both perpetrators and victims of crime, covering a hundred-year span from 1920 to 2020. Detailed is popular culture's interest in true crime and how women in true crime documentation have largely been sexualized and victim-blamed over the decades.

hungarian physical traits: *Exploring Sexuality in Schools* Dorottya Rédei, 2019-07-10 This book explores the place of sexuality in a Hungarian vocational school. Building upon ethnographic research using a post-structuralist and intersectional theoretical framework, the author highlights the voices of teachers and students in their everyday environment and gives them the opportunity to speak about themselves and their experiences: in doing so, addressing a significant gap in the market. The author critically discusses key issues concerning schooling and sexuality, addressing such themes as LGBTQ+ youth and teachers, institutional hierarchy, and the role of sexuality in the re/production of social inequalities through education. Through these topics, she sensitively questions what should be expected of schools in preparing their students for the wider world. The intersectional approach employed by the author will appeal to scholars in a wide variety of disciplines, from gender and sexuality studies to the sociology of education and race and ethnicity studies.

hungarian physical traits: *Creating the Other* Nancy M. Wingfield, 2003 The historic myths of a people/nation usually play an important role in the creation and consolidation of the basic concepts from which the self-image of that nation derives. These concepts include not only images of the nation itself, but also images of other peoples. Although the construction of ethnic stereotypes during the long nineteenth century initially had other functions than simply the homogenization of the particular culture and the exclusion of others from the public sphere, the evaluation of peoples according to criteria that included level of civilization yielded rankings of ethnic groups within the Habsburg Monarchy. That provided the basis for later, more divisive ethnic characterizations of exclusive nationalism, as addressed in this volume that examines the roots and results of ethnic, nationalist, and racial conflict in the region from a variety of historical and theoretical perspectives.

hungarian physical traits: *Patterns of Inter-ethnic Relations with the Roma in the Carpathian Basin* József Kotics, 2023-10-30 Almost three decades of anthropological fieldwork on ethnic coexistence situations, completed by the author of the present volume, have revealed that in the multi-ethnic local communities of the Carpathian Basin, Roma-non-Roma coexistence practices are always based on opposition, regardless of whether the latter are Romanians, Saxons, Slovaks, Ukrainians or Hungarians. After presenting the theoretical-methodological framework and historical processes, this book presents patterns of Roma-non-Roma coexistence that emerge through case studies, which can be directly applied in the fight against the exclusion and stigmatisation of the Roma today. Thus, the book discusses two applied anthropology projects where research results have been used in urban regeneration and development projects. It interprets cannibalism charges against Gypsies as a typical type of chimerical prejudice. Through the case studies, it contributes to

existing research by interpreting the coexistence of different ethnicities in the local socio-historical context, in the local embeddedness of inter-ethnic relations, as a constantly evolving and changing phenomenon, focusing on the performativity, dynamic interaction and functional role of relations.

hungarian physical traits: Making Gaybies Jaya Keaney, 2023-10-06 In *Making Gaybies* Jaya Keaney explores queer family making as a site of racialized intimacy. Drawing on interviews with queer families in Australia, Keaney traces the lived experiences of choice and constraint as these families seek to craft likeness with their future children and tell stories of chosen family made through love. Queer family building often involves multiracial and multicultural encounters, as intending parents take part in the global fertility industry. Keaney follows queer family making through reproductive technologies and highlights the confines of varied transnational reproductive markets and policies as well as changing formations of race, gender, sexuality, and kinship. Whether sharing the story of white gay men choosing Indian and Thai egg donors to make their surrogate-born children's ethnicities visually distinct from their own or that of an Aboriginal lesbian and her white partner choosing a Cherokee donor from the United States to articulate a global Indigeneity, Keaney foregrounds the entwinement of reproduction, race, and affect. By focusing on queer family making, Keaney demonstrates how reproduction fosters a queer multiracial imaginary of kinship.

hungarian physical traits: Give Peace One More Chance! Anthony Tihamer Komjathy, 1992 Anthony Tihamer Komjathy grew up in a small Hungarian town, Satoraljaujhely, which was divided into a Czechoslovakian half and a Hungarian half. The author became interested in the history of Eastern Europe at a young age and has devoted much of his life to examining the treaties and events which have defined geographic and political situations throughout the Eastern countries. *Give Peace One More Chance!* compares the treaties following both WWI and WWII. Komjathy discusses the failure of the treaties and explains that they disregarded the moral principle of national self-determination. He looks at the use of force intended to preserve peace and the demands, especially those of the Hungarians, to rectify the dishonesty and manipulation imposed upon them. Komjathy interprets the implications of revisions of the Munich Agreement, the First and Second Vienna Awards and the re-annexation of Ruthenia by Hungary and then, after WWII, the serious consequences of Stalin's (and the Allied Powers') condemnation of the treaties. Komjathy seeks to revise the 1947 Parisian treaty in order to prevent the repetition of such calamities in the Danube Valley. He not only points out existing dangers, but also suggests very useful solutions. Contents: The First Vienna Award; Reunion of Hungary and Ruthenia; The Second Vienna Award; Comparison of Trianon and Paris Treaty; Conclusions and Suggestions; Epilogue; Appendixes: Agreement Between Hungary and Croatia; The Munich Agreement; Letter of the Hungarian Ambassador; Bibliography; List of Maps.

hungarian physical traits: *The Medieval Chronicle* Erik Kooper, 1999

hungarian physical traits: A Nation Divided by History and Memory Gábor Gyáni, 2020-07-12 During the last few decades there has been a growing recognition of the great role that remembering and collective memory play in forming the historical awareness. In addition, the dominant national form of history writing also met some challenges on the side of a transnational approach to the past. In *A Nation Divided by History and Memory*, a prominent Hungarian historian sheds light on how Hungary's historical image has become split as a consequence of the differences between the historian's conceptualisation of national history and its diverse representations in personal and collective memory. The book focuses on the shocking experiences and the intense memorial reactions generated by a few key historical events and the way in which they have been

interpreted by the historical scholarship. The argument of *A Nation Divided by History and Memory* is placed into the context of an international historical discourse. This pioneering work is essential and enlightening reading for all historians, many sociologists, political scientists, social psychologists and university students.

hungarian physical traits: Constructing Race on the Borders of Europe Marsha Morton, Barbara Larson, 2021-03-25 *Constructing Race on the Borders of Europe* investigates the visual imagery of race construction in Scandinavia, Austro Hungary, Germany, and Russia. It covers a period when historic disciplines of ethnography and anthropology were expanding and theorists of race were debating competing conceptions of biological, geographic, linguistic, and cultural determinants. Beginning in 1850 and extending into the early 21st century, this book explores how paintings, photographs, prints, and other artistic media engaged with these discourses and shaped visual representations of subordinate ethnic populations and material cultures in countries associated with theorizations of white identity. The chapters contribute to postcolonial research by documenting the colonial-style treatment of minority groups, by exploring the anomalies and complexities that emerge when binary systems are seen from the perspective of the fine and applied arts, and by representing the voices of those who produced images or objects that adopted, altered, or critiqued ethnographic and anthropological information. In doing so, *Constructing Race on the Borders of Europe* uncovers instances of unexpected connections, establishes the fabricated nature of ethnic identity, and challenges the certainties of racial categorization.

hungarian physical traits: Comparative Archaeologies Ludomir R Lozny, 2011-04-06 Archaeology, as with all of the social sciences, has always been characterized by competing theoretical propositions based on diverse bodies of locally acquired data. In order to fulfill local, regional expectations, different goals have been assigned to the practitioners of Archaeology in different regions. These goals might be entrenched in local politics, or social expectations behind cultural heritage research. This comprehensive book explores regional archaeologies from a sociological perspective—to identify and explain regional differences in archaeological practice, as well as their existing similarities. This work covers not only the currently-dominant Anglo-American archaeological paradigm, but also Latin America, Western and Eastern Europe, Asia, and Africa, all of which have developed their own unique archaeological traditions. The contributions in this work cover these alternative archaeologies, in the context of their own geographical, political, and socio-economic settings, as well as the context of the currently accepted mainstream approaches.

hungarian physical traits: The Culture of History Billie Melman, 2006-06-22 In this original and widely researched book, Billie Melman explores the culture of history during the age of

modernity. Her book is about the production of English pasts, the multiplicity of their representations and the myriad ways in which the English looked at history (sometimes in the most literal sense of 'looking') and made use of it in a social and material urban world, and in their imagination. Covering the period between the Napoleonic Wars and the Coronation of 1953, Melman recoups the work of antiquarians, historians, novelists and publishers, wax modellers, cartoonists and illustrators, painters, playwrights and actors, reformers and educationalists, film stars and their fans, musicians and composers, opera-fans, and radio listeners. Avoiding a separation between 'high' and 'low' culture, Melman analyses nineteenth-century plebeian culture and twentieth-century mass-culture and their venues - like Madame Tussaud's Chamber of Horrors, panoramas, national monuments like the Tower of London, and films - as well as studying forms of 'minority' art - notably opera. She demonstrates how history was produced and how it circulated from texts, visual images, and sounds, to people and places and back to a variety of texts and images. While paying attention to individuals' making-do with culture, Melman considers constrictions of class, gender, the state, and the market-place on the consumption of history. Focusing on two privileged pasts, the Tudor monarchy and the French Revolution, the latter seen as an English event and as the framework for narrating and comprehending history, Melman shows that during the nineteenth century, the most popular, longest-enduring, and most highly commercialized images of the past represented it not as cosy and secure, but rather as dangerous, disorderly, and violent. The past was also imagined as an urban place, rather than as rural. In Melman's account, City not green Country, is the centre of a popular version of the past whose central Images are the dungeon, the gallows, and the guillotine.
