language for learning placement test: Language Assessment for Classroom Teachers Lyle Bachman, Barbara Damböck, 2018-01-25 This book provides teachers with an entirely new approach to developing and using classroom-based language assessments. This approach is based on current theory and practice in the field of language assessment and on an understanding of the assessment needs of classroom teachers. The following key questions are addressed: • Why do I need to assess? What beneficial consequences do I want to help bring about? How can my assessments help my students learn better and help me improve my teaching? • When and how often do I need to assess? What decisions do I need to make to help bring about these beneficial consequences? • What do I need to assess? How can I define the abilities that I want to assess? • How can I assess my students? What kinds of assessment tasks should I create? How can I score my students' responses to these tasks? The authors guide the reader step-by-step through the process of developing and using classroom-based assessments with clear explanations and definitions of key terms, illustrative examples, and activities for applying the approach in practice. language for learning placement test: Validity Argument in Language Testing Carol A. Chapelle, Erik Voss, 2021-01-21 Language tests play pivotal roles in education, research on learning, and gate-keeping decisions. The central concern for language testing professionals is how to investigate whether or not tests are appropriate for their intended purposes. This book introduces

an argument-based validity framework to help with the design of research that investigates the validity of language test interpretation and use. The book presents the principal concepts and technical terms, then shows how they can be implemented successfully in practice through a variety of validation studies. It also demonstrates how argument-based validity intersects with technology in language testing research and highlights the use of validity argument for identifying research questions and interpreting the results of validation research. Use of the framework helps researchers in language testing to communicate clearly and consistently about technical issues with each other and with researchers of other types of tests.

language for learning placement test: <u>A Principled Approach to Language Assessment</u> National Academies of Sciences, Engineering, and Medicine, Division of Behavioral and Social Sciences and Education, Committee on Foreign Language Assessment for the U.S. Foreign Service Institute, 2020-09-19 The United States is formally represented around the world by approximately 14,000 Foreign Service officers and other personnel in the U.S. Department of State. Roughly one-third of them are required to be proficient in the local languages of the countries to which they are posted. To achieve this language proficiency for its staff, the State Department's Foreign Service Institute (FSI) provides intensive language instruction and assesses the proficiency of personnel before they are posted to a foreign country. The requirement for language proficiency is established in law and is incorporated in personnel decisions related to job placement, promotion, retention, and pay. A Principled Approach to Language Assessment: Considerations for the U.S. Foreign Service Institute evaluates the different approaches that exist to assess foreign language proficiency that FSI could potentially use. This report considers the key assessment approaches in the research literature that are appropriate for language testing, including, but not limited to, assessments that use task-based or performance-based approaches, adaptive online test administration, and portfolios.

language for learning placement test: <u>Useful Assessment and Evaluation in Language Education</u> John McE. Davis, John M. Norris, Margaret E. Malone, Todd H. McKay, Young-A Son, 2018-03-01 The specific—and varied—ways in which assessment and evaluation can impact learning and teaching have become an important language education research concern, particularly as educators are increasingly called on to implement these processes for improvement, accountability, or curricular development purposes. Useful Assessment and Evaluation in Language Education showcases contemporary research that explores innovative uses of assessment and evaluation in a variety of educational contexts. Divided into three parts, this volume first examines theoretical considerations and practical implementations of assessment conducted for the purpose of enhancing and developing language learning. Part 2 addresses novel assessment development and implementation projects, such as the formative use of task-based assessments, technology-mediated language performance assessment, validation of educational placement tests for immigrant learners, and the use of assessment to help identify neurolinguistic correlates of proficiency. The final section of the book highlights examples of argument-based approaches to assessment and evaluation validation, extending this critical framework to quality assurance efforts in new domains. Adding to research on traditional and conventional uses of testing and evaluation in language education, this volume captures innovative trends in assessment and evaluation practice that explicitly aim to better inform and enhance language teaching and learning.

language for learning placement test: <u>Allocating Federal Funds for State Programs for English Language Learners</u> National Research Council, Division of Behavioral and Social Sciences and Education, Board on Testing and Assessment, Committee on National Statistics, Panel to Review Alternative Data Sources for the Limited-English Proficiency Allocation Formula Under Title III, Part A, Elementary and Secondary Education Act, 2011-06-20 As the United States continues to be a

nation of immigrants and their children, the nation's school systems face increased enrollments of students whose primary language is not English. With the 2001 reauthorization of the Elementary and Secondary Education Act (ESEA) in the No Child Left Behind Act (NCLB), the allocation of federal funds for programs to assist these students to be proficient in English became formula-based: 80 percent on the basis of the population of children with limited English proficiency1 and 20 percent on the basis of the population of recently immigrated children and youth. Title III of NCLB directs the U.S. Department of Education to allocate funds on the basis of the more accurate of two allowable data sources: the number of students reported to the federal government by each state education agency or data from the American Community Survey (ACS). The department determined that the ACS estimates are more accurate, and since 2005, those data have been basis for the federal distribution of Title III funds. Subsequently, analyses of the two data sources have raised concerns about that decision, especially because the two allowable data sources would allocate quite different amounts to the states. In addition, while shortcomings were noted in the data provided by the states, the ACS estimates were shown to fluctuate between years, causing concern among the states about the unpredictability and unevenness of program funding. In this context, the U.S. Department of Education commissioned the National Research Council to address the accuracy of the estimates from the two data sources and the factors that influence the estimates. The resulting book also considers means of increasing the accuracy of the data sources or alternative data sources that could be used for allocation purposes.

language for learning placement test: Language Assessment H. Douglas Brown, 2018-03-16 Language Assessment: Principles and Classroom Practices is designed to offer a comprehensive survey of essential principles and tools for second language assessment. Its first and second editions have been successfully used in teacher-training courses, teacher certification curricula, and TESOL master of arts programs. As the third in a trilogy of teacher education textbooks, it is designed to follow H. Douglas Brown's other two books, Principles of Language Learning and Teaching (sixth edition, Pearson Education, 2014) and Teaching by Principles(fourth edition, Pearson Education, 2015). References to those two books are made throughout the current book. Language Assessment features uncomplicated prose and a systematic, spiraling organization. Concepts are introduced with practical examples, understandable explanations, and succinct references to supportive research. The research literature on language assessment can be quite complex and assume that readers have technical knowledge and experience in testing. By the end of Language Assessment, however, readers will have gained access to this not-so-frightening field. They will have a working knowledge of a number of useful, fundamental principles of assessment and will have applied those principles to practical classroom contexts. They will also have acquired a storehouse of useful tools for evaluating and designing practical, effective assessment techniques for their classrooms.

language for learning placement test: <u>Fluent Forever</u> Gabriel Wyner, 2014-08-05 NATIONAL BESTSELLER • For anyone who wants to learn a foreign language, this is the method that will finally make the words stick. "A brilliant and thoroughly modern guide to learning new languages."—Gary Marcus, cognitive psychologist and author of the New York Times bestseller Guitar Zero At thirty years old, Gabriel Wyner speaks six languages fluently. He didn't learn them in school—who does? Rather, he learned them in the past few years, working on his own and practicing on the subway, using simple techniques and free online resources—and here he wants to show others what he's discovered. Starting with pronunciation, you'll learn how to rewire your ears and turn foreign sounds into familiar sounds. You'll retrain your tongue to produce those sounds accurately, using tricks from opera singers and actors. Next, you'll begin to tackle words, and connect sounds and spellings to imagery rather than translations, which will enable you to think in a foreign language. And with the help of sophisticated spaced-repetition techniques, you'll be able to memorize hundreds of words a month in minutes every day. This is brain hacking at its most

exciting, taking what we know about neuroscience and linguistics and using it to create the most efficient and enjoyable way to learn a foreign language in the spare minutes of your day.

language for learning placement test: Scoring Second Language Spoken and Written Performance Ute Knoch, Judith Fairbairn, Yan Jin, 2021 The ability to speak and write effectively is widely recognized as an important skill in many contexts and for many purposes, both personal, educational and professional. Because these skills are considered important in second and foreign language learning contexts, they are often included in performance assessments. The scoring of such performances is, however, a complex undertaking and has attracted much attention, both in first and second language learning contexts. The increasing use of automated scoring systems has added to this complexity in recent years. It is therefore all the more surprising that there is no book available that provides an overview of this topic area - the scoring of second language performances. This monograph fills this gap, by drawing together the latest literature in the area. It focusses on issues relating to both rater-mediated assessments and sets out consideration in relation to automated scoring systems (and other technology) which are increasingly used in our field. This monograph provides a useful introduction to graduate students, researchers, test developers, other practitioners and teachers to this topic which has in many ways dominated the field of language assessment over many decades.
